Ook leverbaar in ATEX uitvoering
Also available in ATEX version

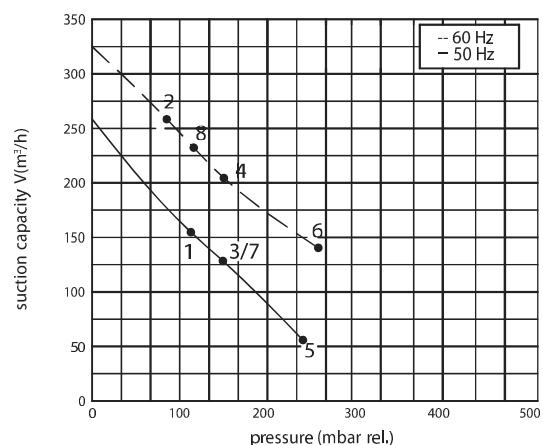

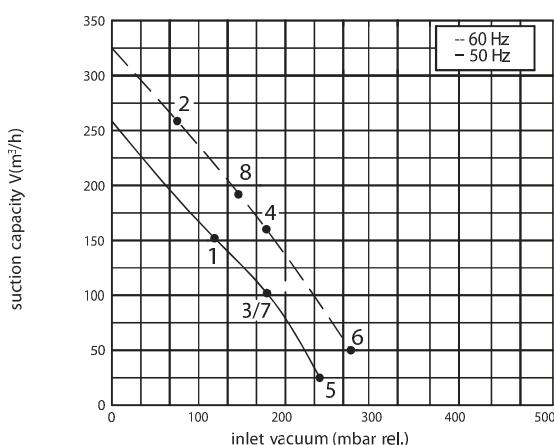

De constructie van de ringventilatoren is gebaseerd op het principe van de zijkanaal. De ventilatoren kunnen zowel als afzuig- of als compressieverventilator werken en zijn ontworpen voor continu gebruik. Het apparaat wordt direct op de motoras gemonteerd. Alle draaiende delen zijn dynamisch uitgebalanceerd om absolute afwezigheid van trillingen te garanderen. Volledig gegoten aluminium constructie voor maximale stevigheid en gebruiksgemak.

Construction of the ring blowers fans is based on the lateral ducts principle. The blowers can operate as either exhaust or compression fans and are designed for continuous service. The device is assembled directly on the motor shaft. All the rotating parts are dynamically balanced to ensure absolute absence of vibration. Full die-cast aluminium construction for maximum sturdiness and ease of handling.

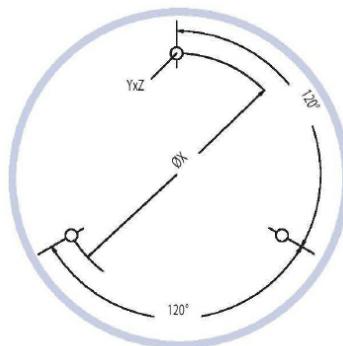

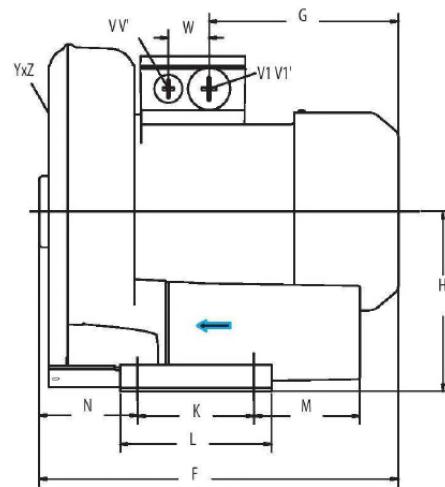

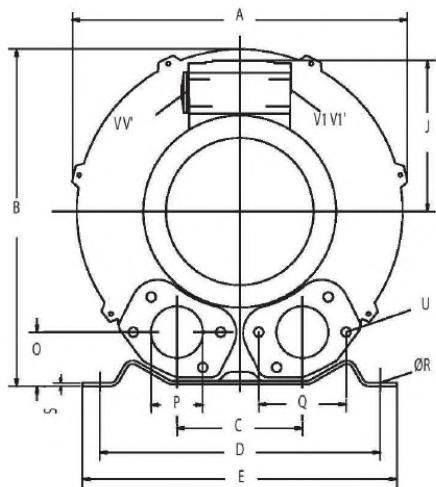

Curve	Model	Frequency	Output power	Voltage	Rated current	Noise	Weight
